# Manual Handling – TILE Risk Assessment Guide

**Task**
Does the task involve twisting, stooping, reaching, repetitive handling or long carrying distances? Can the task be redesigned or mechanised?

**Individual**
Does the job require unusual strength or height? Is the person pregnant, young, or returning from injury? Have they been trained?

**Load**
Is the load heavy, bulky, unwieldy, hot, sharp or unstable? Can it be split, made lighter or given handles?

**Environment**
Are there space constraints, uneven or slippery floors, poor lighting, or extreme temperatures?
